Website Penetration Test

€100

ONE-OFF

Once Off

One-off web pentest built for small and medium businesses — peace of mind that your site won't get you breached.

// DELIVERABLES

- A focused test of a single website against common web vulnerabilities (OWASP Top 10).
- Automated scanning paired with targeted manual validation to weed out false positives.
- A plain-English findings report with severity ratings.
- A prioritised, practical list of fixes.

// EXPECTED OUTCOMES

- Affordable, accessible security assurance for SMBs.
- Fast identification of the common issues that most often lead to compromise.
- Confidence to share with your own customers.

// METHOD OF ENGAGEMENT

A lighter-weight, single-site engagement run remotely — the entry-level counterpart to the goal-based web application penetration test. Add-on remediation service available if you'd like us to take care of the hardening and maintenance.

// TIMELINE

Indicative: ~1-2 business days from scope confirmation to report.

- Project management is included in all prices.
