Incident Response — 10 Hours

€1,000

10-HOUR BLOCK

10 hours of incident response support.

// DELIVERABLES

- Triage and scoping of the incident.
- Containment, eradication and recovery guidance, following the NIST incident response lifecycle.
- Indicator-of-compromise analysis and an incident timeline.
- A post-incident summary with recommendations — all delivered within the 10-hour block.

// EXPECTED OUTCOMES

- Expert support to limit impact and restore operations.
- A documented record of the incident and how it was handled.
- Concrete lessons-learned to reduce the chance of recurrence.

// METHOD OF ENGAGEMENT

Remote-led response support. Our responders direct the work; the client provides access, data and on-the-ground actions. The 10 hours are drawn down against an active incident or readiness work.

// TIMELINE

Engaged on demand. The 10 hours are used as the incident requires; response begins within an agreed response target.

// A single 10-hour block is a starting point – not all IR deliverables fit one block. Larger incidents are scoped on demand.

- Project management is included in all prices.
